LEFT VENTRICULAR ENLARGEMENT CALCULATOR

Use this calculator to help determine whether your patient has cardiomegaly

How to use the calculator:

1. Enter the dog's weight into the box

2. Measure the dog's LVIDd in M-mode (in cm)

3. If the dog's LVIDd measurement is greater than or equal to the value shown in the second box, they have cardiomegaly

Dog's weight (kg):

Abnormal LVIDd (cm): ≥

Please note that this calculator is based on the Cornell allometric scale for patients <70kg*
